IAB Action Items

1994-1995 Term

April 1994

[DONE] Christian Huitema: Edit ISO liaison document to indicate where JTC1 needs to add symmetric text.

[DONE] Christian Huitema: Submit the liaison document to IESG for last call and publication as an informational RFC.

[DONE] Brian Carpenter: Gather information to learn more about the nature and scope of the problems with ISOC/IAB/IETF image. Obtain comments from various communities and report on the results.

[DROPPED] Elise Gerich: Create a sample report/press release for the month of April.

[DROPPED] Paul Mockapetris, Steve Crocker, Jon Postel: Determine which documents are required to obtain insurance (just standards process documents, or complete set?). Get these documents cleaned up in time for the June ISOC trustees meeting--by identifying those people willing to do it, and then pushing them.

[DONE] John Romkey: Start to plan IAB retreat on interesting applications over the Internet. Decide on date and location. Determine problems, agenda, experts to be approached, etc.

[DONE] Abel Weinrib: Collect votes on issues for next meeting.

May 1994

[DROPPED] Christian Huitema and Steve Crocker: Once Bob Braden has finished and released the security workshop report, prepare a brief note outlining actions that should be taken to follow up and either implement or explore the ideas presented in the report.

[DONE] Christian Huitema: Send a message to John Romkey and Eric Huizer encouraging them to coordinate on planning for the applications workshop.

[DONE] Dave Sincoskie: Send copies of the U.S. National Research Council report on infrastructure for the NII to IAB members.

[DROPPED] Dave Sincoskie: Prepare a short straw proposal outlining a "vision thing" architecture document.

[DONE] Yakov Rekhter: Prepare a review of existing IETF work related to "Routing architecture for a multi-provider, international internet."

July 1994

[DONE] John Romkey: Plan IAB retreat on interesting applications.

[DONE] Brian Carpenter: produce a document about image by Toronto for us to talk about in the IAB meeting on Sunday--starting with recommendations, then summarizes input.

July 1994

[DONE] Christian Huitema: Send mail to SC6 to clarify "normative" reference to IETF standards.

[DONE] Elise Gerich: Draft a memo to the NICS reiterating that someone who wants a unique address should get one, even if they are not ready yet to connect to the Internet.

September 1994

[DONE] Elise Gerich: Submit to the RFC editor the document on assignment of global addresses and the use of 1597.

[DONE] John Romkey: Send a draft agenda for the workshop to the ii-workshop list for discussion.

[OPEN] Lixia Zhang, Yakov Rekhter and Phill Gross: Write discussion paper on the impact of commercialization on the Internet.

[OPEN] Christian Huitema: Write discussion paper on the integration of services and its impact on usage and models of usage.

[OPEN] Yakov Rekhter: Revise RFC 1560.

October 1994

[DONE] Dave Sincoskie: Follow up on standardizing S/key within the IETF.

[DONE] Lixia Zhang: Ask end-to-end group for their advice on how to measure the "performance" of an internet.

[DROPPED] Dave Sincoskie and Paul Mockapetris: Organize a BOF on internet performance measurement at the next IETF.

[OPEN] Jon Postel (IANA): Report on problems with the current DNS registry process and possible solutions.

[DONE] Christian Huitema: Follow up with Tony Rutkowski on Internet usage survey.

November 1994

[DROPPED] Dave Sincoskie: Call Tony Rutkowski to see if he will take on ownership of the Internet usage survey.

[DONE] Christian Huitema, Jon Postel and Steve Crocker: Write statement re. "branding" RFCs with a protocol number and creation of a web page to support this.

[DONE] Christian Huitema: Get final text of liaison document from Stev Knowles and publish it.

[DROPPED] Lixia Zhang: Review DOD versions of the IETF standards documents.

December 1994

[DONE] Christian Huitema: Set up an organizing committee for an IAB workshop on measurements of Internet service.

[DROPPED] Christian Huitema: Prepare letter to the Internet Society stating that the IAB believes that ISOC should be careful not to "sell its soul" and asking how it plans to support the IETF secretariat.

[DROPPED] Christian Huitema: Prepare survey of how to use existing router MIBs to collect accounting information.

[DONE] All: Provide feedback to Yakov on his paper about "routing architecture for a multi-provider, international internet."

[OPEN] Jon Postel: Prepare a draft of a statement for ISOC to sign re. proper use of its ownership of IPv6 addresses.

January 1995

[DONE] Elise Gerich: Update document on globally unique addresses.

[DONE] Robert Elz: Respond to comments on the "globally unique addresses" document.

[DONE] Lixia Zhang: Generate progress on geographic addressing by creating a design team (it might include Steve Deering, Paul Francis, Christian, Yakov).

[DONE] Yakov Rekhter: Post routing architecture document as an ID from the IAB after asking for final input from the IAB for one week.

[DONE] Mike St. Johns: Talk to Jon Postel re. rewording of the letter from the IAB to the trustees re. ownership of the address space.

[DONE] Christian Huitema: Convince someone to chair a BOF at the next IETF on measurement of Internet service.

[DONE] Abel Weinrib: Ask John Curran to let new IAB members know of Friday meeting.

February 1995

[DONE] Jon Postel: Prepare a new draft on "Not all RFCs are standard" incorporating the comments received. Get three authors' review and post as a draft again.

[DONE] Yakov Rekhter: Add examples to the "routing in multiprovider Internet" document.

[DROPPED] All: (BY Feb. 21!) Rank order the list of open issues in the "routing in multiprovider Internet" document with respect to their criticality.

[DONE] Christian Huitema: Get Vint Cerf to sign the ISO/JTC1/SC6 statement.

[OPEN] Jon Postel and Abel Weinrib: Develop a draft document outlining the rules, practices, etc. for the Internet Research Task Force.

February 28 1995

[OPEN] All: Send suggestions for areas of work and people to lead them for the IRTF.

[DONE] Paul Mockapetris: Pass the "not all RFC are standard" draft by the IESG.

[OPEN] Lixia Zhang: Make progress on the special group on non-provider based addressing.

[DONE] Abel Weinrib: Get a slot (early afternoon on Monday or Tuesday preferred) for the ONC inquiry.

[DONE] Christian Huitema: Send a public acknowledgment of appeal to Dave Crocker (and IETF list) and state that we plan to discuss this matter at an open IAB meeting in Danvers.

[DONE] Christian Huitema: Contact the various players re. the ONC inquiry. Gather information and request that they be prepared to speak.

[DONE] Robert Elz: Develop clear statement of the topic of the ONC inquiry.

[DONE] Robert Elz: Start the discovery process: Get advance statements of what they plan to say from the various players.

March 1995

[DONE] Yakov Rekhter: Last call and publish the "routing in multiprovider Internet" document as an informational RFC.

[DONE] Christian Huitema: Arrange for signing of (and sign) ISO/JTC1/SC6 agreement during open IAB meeting at Danvers.

[OPEN] Christian Huitema: Prepare security "propaganda" (summary of what is going on in security coordinating with Jeff Schiller).

[DONE] Christian Huitema: Send Bill Simpson mail inviting him to present at the ONC RPC inquiry.
